**Protecting Your Private Health Information and Risks:** This method of communication and viewing information through the Roane General MyRGHchart Patient Portal is designed to prevent unauthorized parties from being able to access or read messages while they are in transmission by using encryption. The Patient Portal uses industry standard security measures to reduce the possibility that an unauthorized person may gain access to your account. These security measures are similar to the technology banks use for their online banking services. No system is perfect and Roane General will do its best to maintain electronic security.

However, keeping messages secure depends on two (2) additional factors: (a) the secure message must reach the correct email address, and (b) only the authorized individual must be able to get access to it. Only you can make sure these two (2) factors are present. We need you to make sure that we have your correct email address and are informed if it ever changes. You also need to keep track of who you have authorized to access your Roane General MyRGHchart Patient Portal account, so that only you or someone you have authorized can see messages received or other information in your Patient Portal. You should protect your Patient Portal login information from anyone whom you do not want to access your Patient Portal account. **Please notify us immediately of any unauthorized use of your login information or if you believe that your login or password is no longer confidential or has been stolen.**

We will not answer questions or send protected health information by regular email. Even with these security measures, we cannot guarantee the confidentiality, security, or integrity of Patient Portal information.
By signing below, you understand the following terms, conditions, and responsibilities apply to the Patient Portal, and you give your informed consent to participate in compliance with these terms, conditions, and responsibilities:
